+61 404 781 574 | vinulakas.98@gmail.com | Adelaide, SA | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL PROFILE

Cyber Security graduate with a Master of Information Technology (Cyber Security) from the University of South Australia, complemented by a Software Engineering background. Experienced in cyber risk assessment, Cyber Security governance, infrastructure security, network segmentation, and identity and access management through hands-on work supporting operational IT environments at the National Railway Museum. Skilled in translating technical findings into clear, risk-based recommendations for technical and non-technical stakeholders to improve organisational security posture. Passionate about Cyber Security and committed to continuous professional development, with a strong interest in Security Operations, Governance, Risk Management, and Infrastructure Security.

EXPERTISE

Cyber Risk Assessment • Security Operations • Infrastructure Security • Cyber Security Governance • Identity & Access Management • Network Segmentation • Incident Response • Stakeholder Engagement

TECHNICAL SKILLS

Governance, Risk & Compliance: NIST CSF • ISO/IEC 27001 • Cyber Risk Assessment • Risk Registers • Control Gap Analysis • Security Policies & Standards • Incident Response Planning

Security Operations: Splunk • Windows Event Logs • Sysmon • Wireshark • Nessus • MITRE ATT&CK • Malware Static Analysis

Infrastructure & Identity: Active Directory • Microsoft Entra ID • Identity & Access Management (IAM) • Access Control • Multi-Factor Authentication (MFA) • Network Segmentation • Sophos Firewall • Microsoft Defender

Cloud & Development: Python • Java • JavaScript • Microsoft Azure • Amazon Web Services (AWS) • ReactJS • Node.js • Burp Suite

PROFESSIONAL EXPERIENCE

Cyber Security Volunteer | National Railway Museum | Port Adelaide, SA

March 2026 – Present

- Conduct cyber security assessments across operational IT environments to identify risks relating to network architecture, infrastructure exposure, identity and access management, operational dependencies, and cyber security governance.
- Developed comprehensive asset inventories, software application inventories, and network topology documentation covering servers, NAS devices, CCTV infrastructure, workstations, wireless access points, and networking equipment to improve visibility of organisational assets.
- Designed a proposed segmented network architecture separating User, Server, and CCTV environments, including traffic flow recommendations and access control logic to reduce lateral movement and strengthen network security.
- Collaborated with museum stakeholders and external managed service providers to support VLAN-based network segmentation planning, Sophos firewall architecture validation, infrastructure verification, and implementation preparation.
- Assessed identity and access management practices, reviewed multi-factor authentication opportunities, and developed practical recommendations aligned with operational requirements and volunteer-based user constraints.
- Developed cyber security governance documentation including access management procedures, password standards, acceptable use guidelines, software governance controls, cyber security awareness material, implementation validation documentation, and long-term cyber security improvement roadmaps.
- Communicated technical cyber security risks and remediation strategies to both technical and non-technical stakeholders, supporting informed decision-making and ongoing security improvement initiatives.

Cyber Risk Analyst (Capstone Project – High Distinction)

National Railway Museum | University of South Australia | Adelaide, SA

February 2025 – July 2025

- Conducted structured cyber risk assessments across 6–8 operational systems, identifying more than 20 cyber risk scenarios and mapping security controls to the NIST Cyber Security Framework (CSF) and ISO/IEC 27001.
- Performed threat modelling exercises to identify attack vectors, assess organisational vulnerabilities, and recommend practical mitigation strategies aligned with business risk tolerance.
- Developed key governance artefacts including an Incident Response Plan, Information Security Policy, and structured Risk Register to strengthen organisational cyber resilience.
- Produced a prioritised 12-month Cyber Security uplift roadmap focused on governance, infrastructure security, access management, and risk reduction.
- Presented technical findings and risk-based recommendations to stakeholders, translating complex cyber security concepts into clear, actionable business outcomes.

ADDITIONAL PROFESSIONAL EXPERIENCE

Team Member | Woolworths Group | Adelaide, SA

October 2023 – Present

- Selected to undertake Acting Assistant Department Manager responsibilities during a five-week management absence, coordinating daily operations, delegating tasks, supporting team performance, and contributing to operational decision-making in a fast-paced retail environment.
- Deliver high-quality customer service while maintaining compliance with food safety, workplace health and safety, and operational procedures.
- Collaborate with team members to ensure efficient workflow, stock availability, and achievement of daily operational targets.
- Build strong communication and stakeholder engagement skills by working effectively with customers, colleagues, and management across a high-volume retail environment.

Software Engineering Consultant | Evolza | Colombo, Sri Lanka

March 2023 – July 2023

- Delivered front-end software solutions while collaborating with clients to translate business requirements into structured technical implementations.
- Facilitated client demonstrations, training sessions, and post-deployment support to ensure successful system adoption and operational stability.

Software Engineer Intern | Kavithi Group | Colombo, Sri Lanka

July 2022 – January 2023

- Contributed to front-end development for business applications including ERPNext and the Blynxx Quiz App using modern web technologies.
- Collaborated with development teams to implement user interface enhancements and support software delivery activities.

Software Engineer Intern | iiH Solutions (Pvt) Ltd. | Colombo, Sri Lanka

July 2020 – July 2021

- Developed and maintained front-end components for enterprise software applications using ReactJS.
- Worked collaboratively within an Agile development environment to deliver high-quality software solutions.

EDUCATION

Master of Information Technology (Cyber Security)

July 2023 – July 2025

University of South Australia | Adelaide, SA

Relevant Coursework: Risk Management & Governance • Enterprise Security • Security Architecture & Engineering • Security Operations • Australian Cyber Law & Digital Evidence

Bachelor of Engineering (Honours) in Software Engineering with Industrial Placement

January 2018 – July 2022

University of Westminster | London, UK
